*This book is dedicated to...*

All my family and friends that have supported me and helped me  
become the person that I am today.

Especially, my old (not old as in age - but in time) English teacher Ms Bailey as without her I  
wouldn't be writing poetry today.

## A Dream Love

Your breath on my neck  
Our lips pressed together  
A feeling I can't describe  
Every time your eyes meet mine  
I fall deeper in love,  
With your smile, with the blue in your eyes

I don't need to search anymore  
Because standing in front of my door  
Is my knight, my Mr. Right

With so many fish in the sea,  
I didn't realise how easy it would be,  
To find someone perfect for me

On my mind twenty four seven  
My new found heaven  
A future life  
I long to be called your wife

## A Feeling No One Can Miss

Walking hand in hand  
Strolling side by side  
I stare into your eyes  
Met by your longing gaze  
It's a feeling that you can't miss  
Greeted by your kiss  
Just to be with you  
Is all I'd ever want to do

## A Girl's Love Isn't a Toy

If I don't come first and you think of me last  
Then you should know for sure that I'm becoming your past  
Think of it this way,  
Buying diamonds and pearls isn't the key to my heart  
Saying tender words is the way to make me stay  
Pushing me from left to right is only going to make me want to part

I should be your all and everything  
Not one in a string of meaningless flings

Words aren't always enough  
You should remain by my side even when things start to get tough  
Think of this as real love  
Someone you're proud of  
An angel sent to you from above

Love never fades  
You shouldn't feel the need to upgrade  
Everything you ever want should be in front of you  
Or you shouldn't say those three words, 'I love you'

I want you too  
People say we're just like two love birds  
But I need to be your only girl  
The only one you're thinking of at night  
The only one you want to be holding tight

A girl's love isn't a toy  
It's something you should enjoy  
She's someone you should cherish  
If you don't you love will only perish

## A Grain Of Rice

Dying in Africa  
We say we're starving  
The lost their life, just fighting for a grain of rice  
Supermarkets scatter the streets  
Imagine days on your feet  
All for a grain of rice  
Doctors on our doorstep  
Think of dragging a loved one for miles around  
In the hope that help will be found  
Live a day in their life  
And it'll be easy  
I'm not starving are you?

## A Life Lost

The bullet from the gun  
Lays still in your chest  
Your face cold and alone  
This war isn't something that we can condone  
Promises that it will be all right  
Tell me when there won't be a need to fight

So many lives are lost  
Bodies lying alone and forgotten  
This war has such a big cost  
Please enlighten me  
To why these lives have the key  
Isn't there another way for us to plea?

For you to lie so still  
And for me to watch your blood spill  
All for them to rewrite history  
The reasons will always remain a mystery  
Although you'll be remembered as a hero  
Your story written in The Metro

Your Name unknown  
Your life lost in a war zone

## Addict

Shivering  
Scratching at your skin  
As if trying to let it in  
Mind buzzing  
Unable to focus  
Eyes darting  
Living like a dog  
And then it comes  
Sharp and powerful  
A jolt of life into your body  
How long will it last  
Your heroin fix

## **Ain't Life a Bitch?**

Friends come and go  
Just like the waves of the sea  
Creating a web of lies  
Is that the way life is meant to be?  
Your muffled cries  
Ignored by those who are meant to care  
Laying motionless in a ditch  
And all they are able to say is,  
Ain't life a bitch?

## Ain't No Other Way

Let's sit down  
Talk it out  
Work it out  
There's a future in me and you  
Can you see it too?  
Ain't no other way  
Than to say I love you  
They don't understand what we go through  
We got to have this heart to heart  
So that we won't part  
We fight  
We break up  
But still it's alright  
We get back together  
Maybe this time it will be forever

## All I Want

All I want to do is see you smile  
For you to see that I'm different  
Not one of the crowd  
All I want you to do is for you to let me be  
The person I know I am  
Not who you think I should be

All I want you to do  
Say that you understand  
Because you'll always be proud  
Of who ever I am  
Of whatever I want to be  
I need to know that you'll always love me

## All The Good Things...

Good things start small  
Good people walk tall  
Good things come to those who wait  
Good people don't take the bait

What goes around comes around  
Don't let it knock you to the ground  
Words sting  
Just remember your dreaming  
Got your future planned  
Not making decisions off hand

Remember  
Start small  
Walk tall  
Sit tight and wait  
And good things will come to you

## All You're Worth

I'll give you all you're worth  
From the moon and the stars right down to the earth  
Let's stay together for the rest of time  
Just promise that you'll be mine  
And that you'll never let me go  
Say that our love will grow, is that even possible  
This love is already magical  
Never thought I would have something so special  
Never thought that one person could take over my mind  
I think that this could be a sign  
That you are meant to be mine  
And that we're meant to be together  
For now and forever  
Together we can take on the world  
I want to be your only girl  
The one to know your deepest secrets  
And to never become one of your greatest regrets

## Alone Again

Walking alone  
Disappearing into the shadows  
Hidden from view  
All you can see is the broken smile

Crystal tears  
Broken smile  
Is this how anyone should live?

## Already Broken Promise

I was supposed to be your girl  
The one you grace with diamonds and pearls  
I swore to never hurt you  
But look at what you can do  
Is this you at your best?  
With each lie that comes I'm waiting for the rest  
If this is what love is supposed to be  
Then this isn't what I want, not you and me  
Let's go back to the days when we first met  
The days I really want to forget  
People say things they don't mean  
But I know what I've seen  
We can make up after a fight  
But not this time, we're not going to be alright  
Let's be honest  
Oh wait, let's go back a minute you've already broken that promise  
I'm fed up of trying to put my life back together  
Especially when you said we'd last forever

## Always Yours

I'm stuck on you  
I'm falling in love  
With everything you do  
I want it to be you and me  
Forever and always  
It's the way it should be  
We're together forever  
I never want to let you go  
This I want you to know  
Don't walk in front of me, I may not follow  
Don't walk behind me, I may not lead  
Just walk beside me, and be all that I need  
Without you my heart was left without a beat  
With you in my arms my life is complete  
I want to be the smile you put on your face  
The girl you hold in your embrace  
Just don't ever leave or walk away  
This may sound cliché  
But I love you forever and always

## As Good As Ours

Everybody is looking for love  
Their guardian angel sent from above  
Someone to whisper their name in the dark  
Longing to feel 'that' spark  
Heart skipping a beat  
Every time their eyes meet  
Laying under the stars  
One thing we know,  
Their love will never be as good as ours

## At Least You Say You Do

You say you want me  
At least you say you do  
You say you love me  
At least you say you do  
You say you'll never leave me  
At least you do  
You say you'll never leave me  
At least you say you do

## Because Of You

You've been there since I was small  
And every day since I've grown tall  
When I think of the days we shared  
The memories you have given me, nothing could've compared  
Our bond so strong  
Making everyone belong  
If it wasn't for you  
Then none of this I would have been able to do

## Behind The Photograph

The photograph shows a scene  
But you can remember the memory behind it  
All the people united  
To share the special feeling  
And to make another memory  
To last forever  
Captured by a camera  
Kept in your heart

## Blind Love

I can't live without you  
I wish you felt it too  
Apart but together so strong  
It's with you that I belong  
Can't you see that you're always on my mind?  
I guess I was blind  
To how you really felt  
Even though everyday you made my heart melt

## Carve My Name

I'll carve my name in your heart  
That way I'll be sure we'll never part  
    After our first date  
I know meeting you was fate  
Look what you've done to me  
    If only you could see  
    I've fallen for you  
And all the little things that you do  
No need for the big gestures  
    Or past confessions  
Our future is where we'll be  
    Just you and me

## Changing Times

Chocolate, sweets and treats  
Falling from the sky  
The sound of children's laughter  
Right into the distance  
This is how it used to be

Guns, knives and violence  
From the hands of teenagers  
The sound of victims screams  
Right into the distance  
This is what it's turning to be

The time is changing  
The sound is changing  
The lives are ending

## Crying For Help

The streets are littered with so many teenage pregnancies  
Along with many other dangers and obscenities  
Knives and guns carried for pride  
Cars not owned, just used while on a joyride  
Lives filled with drama  
Police head to foot in armour  
The people you hang with is a statement  
Flowers and crying eyes a constant reminder of the bereavement  
Pouring into the street day after day  
A society crying for help  
Instead sent into a shock everyday  
As another town is on its own

## Directed By Our Dreams

There's you and me  
We all strive to be the best that we can be  
Different but so similar  
We all want to be loved  
We all need to be needed  
Full of ambition  
Directed by our dreams  
You can't change who you are  
It's time to raise the bar  
It's time to succeed  
And exceed all expectation  
Without confrontation an contemplation  
Fulfil your dreams  
To every possible extreme

## Don't Forgive And Forget Anymore

I wish you could see  
That what is happening to you isn't right  
Each time you forgive and forget  
I live with regret  
You are worth so much more  
One day you will open your closed eyes  
And the haze will rise  
You will see what we know  
Then you will realize  
You are worth so much more

## Each And Everyday

Each day I see the rain  
And I'm reminded of your pain  
Every day you told me you couldn't cope  
And I told you we would work it out  
Every day you said of all you're hurt  
And I said one day it would end  
Each day I visit you  
And tell you about my day  
Each day I think of what you never had  
And I wish you were able to cope  
Every day I visit your graveside  
And I say the words only I know how to say  
Every day I say this for you  
And I know one day we'll be together  
Every day I ask you to wait  
And I think about your fate

## Every Piece Of My Heart

Stars are falling  
Everyday my heart is calling,  
I know I acted dumb  
And now my heart is numb  
I'm trying to figure out a way  
To make you understand that,  
I don't want you to go astray  
I can't take another day  
Without you knowing  
Every piece of my heart is on the ground  
Waiting for them to be found

## Find You Again

We were on a stairway to heaven  
Met you at eleven  
Just like Cinderella  
Had to leave at twelve  
My prince charming  
When will you come back  
It's been a year or so  
And in that time my thoughts of you continue to grow  
I see you ahead of me in the street  
It must be fate that there's a second time for us to meet  
All I want to do  
Is say I love you  
When I do I hope you don't forget it  
Because it's taken just over a year or so  
To find you again

## Footprints On Your Heart

Making footprints on your heart  
Is just like walking on untouched snow  
Taking baby steps, until we can watch our love grow  
You'll always be more than and nothing less  
Than I could have asked for  
The blue sky surrounds me  
Since the day that you found me  
Look into your heart  
And that's where I'll always be  
Just let your love reach me

## Friends Forever

Hanging out together  
Known forever  
Our problems shared  
I know you've cared  
Life can be tough  
But together we see it through  
No words exchanged  
Events arranged  
I know that you and I  
Will be friends forever  
Never will I forget  
The time that we met  
The notes passed  
Here in class  
Make the danger seem just like glass  
I think our friendship will be treasured forever  
Especially as we'll be friends forever

## Friendship Versus Relationship

Sometimes it's just easier  
Being friends  
But wanting more  
Maybe even lovers  
We say, I love you  
I know you ain't trippin'  
Coz loving you is all I could ever want to do  
But I don't want to lose the,  
Long talks and late night walks  
If we make the commitment  
Will it be one with regret?  
Hoping that it's one we'll be able to forget  
Friendship versus relationship  
When do you draw the line?  
And take the time to say  
What I have is enough

## From His Eyes

Didn't you see his glance?  
Holding his masculine stance  
Staring across at you  
Wanting to know you little more

A few words  
And you become lovebirds  
Spending time together  
A love built to last forever

## Give You My Love

When your heart is filled with sorrow and despair  
I'll show you my love and make you aware  
Because nothing can compare  
I long to see your smile  
It makes my life seem so worthwhile  
The feeling I have when I'm with you feels so right  
I hope that you'll always be my knight  
Keeping me safe in your arms  
Away from all harm  
With you is where I belong  
It's a feeling I want to have life long

## Go On

Go on and leave  
I don't need you anymore  
Go on baby  
Slam the door on me, once more  
Go on and shout  
It was never me you wanted  
Go on baby  
It was always her for you  
Go on and  
Turn the lights out on our love

## Going Alone

I crushed your heart  
It's time for us to part  
I didn't want to hurt you  
But it's all I could do  
I once longed for your touch  
But now it's all got too much  
We've got to let go  
What we had isn't going to grow  
I can't hurt you again  
Let me go and please stop begging'  
I can't stay  
It's not fair on you to have to pay  
And now your heart has taken the assault  
Let's just go this alone  
Because our love has become outgrown

## Guiding Me

Take me in your arms  
Away from all harm  
Pull me into your chest  
This is my only request  
When I'm down  
You always find a way to be around  
You whisper words of reassurance  
It's becoming a common occurrence  
Your words pull me through  
All the time so true  
I long for the day I'm there for you  
And all you go through

## Helping You

When things happen to you  
There's so much more I wish I could do  
You and me will battle through  
Especially now, so much has been taken from you

The support we get  
I'll never forget  
Especially all of the upset  
But there's still time yet  
For us to forget  
All of this pain and upset

The things that happen to you  
I know we'll muddle through  
Together we'll change this trouble  
To something so much more cheerful

## Hidden Words

Hidden inside of you  
Are the things you can't say  
The true feelings you hide  
Some of your biggest dreams  
Your deepest fears

Open up, and let it all out  
Someone will understand  
But being you, the words get stuck  
You say the words you think we want to hear  
One day everyone will know what you have to say  
And they will understand your mistakes

## Homeless

Cold and lonely  
I know for sure he won't be the only  
No bed or food  
Is it a wonder he's in such a bad mood  
Passersby narrowing their eyes  
No words pass their lips, not a hello or goodbye  
Rejected by society  
Not trusted with any responsibility  
Neglected and alone  
Without a shelter to call home  
Roaming the street  
Trying to survive in the extreme heat  
With one companion, man's best friend  
Just to live, every law he has to bend

## Hood Up, Head Down

Hood up, head down  
Plodding across the ground  
Face mysterious  
The public become curious  
Hood up, head down  
The misunderstood frown  
Walking around  
The soul never found  
Hood up, head down  
Strolling through the town  
Ahead another rowdy crowd  
All with heads bowed  
Hood up, head down  
Plodding across the ground  
Heading home again  
Tonight I have found enemy and friend  
Hood up, head down  
Once again...

## I Can Always Live With The Memories

We are done  
But let's not be forgetting  
All the memories  
And the making of the melodies  
We've had our fair share of  
Arguments, fighting and fussing  
You take a step forward  
But I'm quite happy staying back here in the past

I might be blind  
But baby understand  
I'm willing to let you go  
If you let me stay here  
With all of our memories  
I might sit up all night  
But it's not the daily fights that stay on my mind

Remember how we used to be  
But I guess the world just got in the way  
Every day you had to work really late  
Each night I was willing to wait  
Don't tell me you were just chillin' with your mates

See where we end  
It's just like where we began  
Remember the days when I made your world go round  
It's hard to watch you go  
But I can always live with the memories

## I Guess It's Too Bad

I gave you my heart  
You said we would never part  
I gave you my soul  
You said it was a feeling beyond all control

It wasn't in our power  
That our love turned sour  
Your love turned to her

Remember what we had  
I'll wish it lasted forever  
But I guess that's just too bad

## I Hope

The things we do together  
Will stay in my mind forever  
The trust we share  
No one can compare

I'll stick by you  
In whatever you do  
I know life can be tough  
But I hope I can be there for you enough

## I Know

I know that you don't  
I know that you won't  
But I still want to know  
How to make you love me  
How to make you care  
I know things went wrong  
I know that we belong  
Can't you see,  
Your love in me?

## I Pray

I see where you last lay  
And then I pray  
If I knew what brought them to do this  
But that wouldn't change what I miss  
What if I was there?  
Would you still be here?  
Why have you been taken from us like this?  
Is it like some cruel test?  
Everything passes in a haze  
I'm living in a daze  
All I can see is where you last lay  
And then I wish  
I was with you on your last day  
You've gone and won't be coming back  
All I ask for,  
Is one more day.  
God, please reunite is someday

## I'll Never Be Alone

I could look into your eyes all night  
You captured my heart at the first sight  
Your lips so soft  
In you I'm lost  
S love that could last forever, I don't know  
He's a gentleman who insists on walking me home  
Exchanging numbers he can't believe I'm alone

Five years later, I have a ring on my finger  
Our baby's laugh as my ringer  
We have a house to call our own  
And a promise from him that I'll never be alone

Because we have a love to last forever  
As we are a couple meant to be together

## I'm Glad We're Through

Your love is like a fire  
Once it was burning and strong, built to last  
Now it's dying, dwindling in its ashes  
All I want is for a way to blow the smoke away  
A brand new start  
Is that too much to ask for?

You send crazy thoughts through my mind  
Someone I once needed so much  
Turned into someone I can't even trust  
As the words tumble from your mouth  
I've leant to let them just slip passed

I deserve more  
You've left my heart shattered on the floor  
I believed in you  
But there wasn't anything you could do  
One thought in your mind,  
It wasn't love  
Now all is said and done,  
It's just the memories left behind

I'm not tied to you  
You're a closed door  
I've found someone who gives me more  
And now I'm happy to say I'm glad we're through

## I'm Not Afraid

Don't stereotype me  
Please don't tell me who I should be  
In my head I know  
And that's how my personality is going to grow  
I see all the problems you see  
Don't try and blame them on me  
The streets have a voice  
Every person has a choice  
Decide what path their going to take  
What laws their going to break  
Nobody will force the weapon in their hand  
Buts lets join together and make a stand  
Guide them to the right way  
It's your turn to be a role model today  
Take some responsibilities  
Don't be blaming us for all the controversies

We drive you to the brink  
Day after day you see another turn to the drink  
I'll stand up for those without a voice  
I'll stand up for those without a choice  
I'm proud to be different  
Not like all the others up the duff you know, pregnant  
I'm at college everyday  
Are you getting what I'm trying to say?  
I'm not like them  
Most of their choices I don't condemn  
Not smoking, not ever  
Have I taken drugs? No never  
Don't judge what you don't understand  
That's why I'm making a stand and raising my stand  
I've got a voice  
And I'm making my choice

## Inspiration

A hero comes along  
Without a fear knowing where they belong  
With every step they take  
Another heart may break  
But they search inside themselves  
To follow the dreams the desire  
Each a hero becoming an inspiration  
To the whole population

## Is It Out Of Place?

Can't you see the tears running down my face?

Don't they look out of place?

Can't you see the bruises on my skin?

Your only sin

Can't you see the pain in my eyes?

It shouldn't be a surprise

Raise your hand

Turn it into a fist

Strike me hard

Day and night

Do it at your will

I can't change it

One day you'll see the pain in my eyes

One day you'll see the tracks on my cheeks

One day I won't be blue anymore

## It's A Lie That I Fear

I'll always be beside you  
In whatever you go through  
Our love will last  
Forget the past  
I'll give my hope to you  
And long for the day you do to

Say you'll be there  
Say that you care  
I need to know  
As you never let your feelings show

Is it me that you need?  
Is it me that you long for?  
Is it me that makes your heart soar?

Just tell me the truth  
Even if it's not the words I want to hear  
It's a lie that I fear

## It's Time

Watch the rainbow paint the sky  
Don't let time pass you by  
Memories are created by families and friends  
Forget all the arguments it's time to make amends  
Try and find a way back  
It's time to get on the right track  
Never let your dreams slip away  
Because tomorrow is a new day  
The future is in your hands  
Turn the page; it's time to make some new plans

## It's You

They say those words  
Just staring at the guy wearing the converse  
For me, it's you that I need  
Taking it slow  
Letting our love grow  
Spend your love on me  
That's the way it should be  
No other guy,  
Will catch my eye  
Cause it's you that makes my heart fly

## Jailbird Love

I can listen to you lie  
But every time another part of me will die  
And another tear I will cry  
Just like a gunshot to my heart  
A bullet to my brain  
But by your side I still remain

I'm told I deserve better  
More than a jailbird and his monthly letter  
Locked away for his violence  
Without him around the house is filled with a deathly silence  
No crashing plates  
No drug taking mates  
Just me and my bruises

I know people think you're abusive  
I know people think I'm stupid  
Maybe even deluded  
How can you help who you fall for?  
But I can't withstand this love anymore

I am stronger than this  
Not taken in by your kiss  
I'll tell it to you straight  
But I've left it too late

Now I am the reason you're in your cell  
Accompanied to my farewell  
Maybe it was just a possessive love  
Now I can only be represented by a white dove

## Just Be Content

Keep knocking at the door  
You never know it may just need one more  
There will always be opportunities  
Being embraced with controversies  
Look into the future  
It's your dreams you need to nurture  
Live the moment  
There's no problem with just being content

## Just For You

So many faces  
Create a million places  
Connected together  
A community that lasts forever  
Creating a special place  
Illustrated with many familiar faces  
Somewhere filled with support  
To make everything easier for you  
When you feel like there's nothing you can do  
Just look around you  
And you'll see all that's there for you

## Just Makes Us Stronger

Close in my heart  
But in reality far apart  
Together we're meant to be  
I know you agree  
With you by my side  
A feeling I never want to hide  
Together is how we're meant to be  
Nothing can be left unsaid  
We'll be fine  
Just make sure that you stay mine  
Let's do this together  
At least then we know we'll be forever

## Just Me And You

I've never stopped believing in us  
Forget everyone else  
Just know that I believe in you  
And all that you do  
Apart but together  
I know this will last forever  
I'll be with you  
Wherever you go  
Whatever you do  
Just know that I'll be there  
And be aware  
My heart is with you  
So whatever you do  
Know that it's us against the world  
Even if I'm not there  
Just you and I  
Forget the tears  
Forget the pain  
Together we'll see it through  
Just me and you

## Knowing You

We haven't known each other long  
Although that doesn't mean  
We wouldn't know  
Each other through and through

Take my hand  
And show me your love firsthand  
Kiss my lips  
No need to follow a script  
Your touch so gentle  
Everything so sentimental

## Lady So Fine

You follow that girl across the room  
Saying to your fellas, "damn she's fine"  
Trying not to be cocky or arrogant  
It's you can do to stop your heart from jumping out of your chest  
Working your way towards an opportunity to wine and dine  
This lady so fine  
No worries if she's got a man  
Cause you've thought of plenty of ways to make them part  
No second thoughts of what you'll have to do  
All you know is you've got to make her your girl

## Leave Me

I was small  
You held my hand  
Saw my first smile  
Guided my first few steps  
Then it's blank  
You left leaving no memories  
No regrets  
You'd rather be placing bets  
I want to leave you a message  
I hope I've done you proud  
But you've left me with a love unfound

## Let Me Walk Away

You see me sitting there all alone  
Crying down the phone  
You'll never know  
How I felt about you  
What I would have done for you  
You were my dream  
And I was your queen  
But then you changed  
Every date rearranged  
Putting your guys first  
Our love was always cursed  
Just let me walk away  
Stop trying to get me to stay  
This isn't what I planned  
I'm not yours on demand

## Look Into My Eyes

When you look in my eyes  
Do you see the problems I'm trying to solve?  
Are you able to tell me that there's some hope?  
Will you tell me how long I'll have to wait?  
Until everything's right again

When you look in my eyes  
Do you understand why I'm unable to hold my head high?  
Will you be able to tell me everything's alright  
Are you able to help me in anyway?

Deep inside we both know  
I have to do this alone  
To know you are there is enough  
And it has given me strength  
To go alone on this journey

## Love Is Overrated

Love is overrated  
In the end it's only your feelings that will be obliterated  
My feelings are left stranded at the door  
Yet I'm still left wanting more  
I can't get it into my head  
That what we had began and ended in your bed  
You're turning me into a whore  
Because our love is becoming a chore  
I might well be poor  
It was your love that I needed to make me rich  
Go ahead, keep cursing my name  
We both know that won't make me your bitch  
Sleeping around is how you got your fame  
But somehow I got it into my head that your soul I would be able to tame  
I'm working day and night  
To reach a new height  
Each day the bar is raised  
All I'm asking for is some praise  
I need a wish, I'm on my knees ready to prey  
Hoping that tomorrow will be my day

## Meaningless

It never crossed my mind  
That I could be unwanted by so many  
That what I feel could be so meaningless  
If I said what was in my head  
Then you would care even less  
I didn't realize this was such a big mess  
Now I don't feel afraid of any of this  
I know I'm different and you don't like it  
But if you want to know me, you'll have to understand me  
I'm never going to change  
And because of that no words will be exchanged  
Everything will stay the same  
Except I now know who I am inside  
Whether that's who I am, or the one I show  
I'm just trying to let you know

## Meant To Be

Every time I hear your voice  
I know I made the right choice  
Writing my first name with your last making me you're Mrs  
Every day I can't wait for one of your kisses  
You light up my life when things get dark  
Our fingers intertwined strolling around the park  
If the day turns to night, I'll love you by candlelight  
When our eyes met I knew my heart was sold  
Together we're going to make a teen love story with a happy ending  
Because when I'm with you my heart doesn't need mending  
Whoever said dreams don't come true  
Hasn't seen me when I'm with you

## My Baby

Please don't go away  
I can't let our love go astray  
I don't want to watch you walk away  
Every time I look at you  
I know that you'll always be mine  
I need you more each day  
And for this I'll pray  
For you to stay  
How can I show you that you live inside my mind?  
Our hearts remain intertwined  
Walking together hand in hand  
No need for anyone to misunderstand  
This is our love for each other  
Every time you glance at me you make my heart soar  
A feeling like never before  
I want you to be with me forever  
Going on a journey to wherever  
Doing whatsoever  
I just want you to be next to me  
Side by side forever is where we should be

## My Best Friend and Love, My Angel From Above

From the moment I looked into your eyes  
I was greeted by loves surprise  
Never thought I would be here in your arms  
Guarded from all harm  
Please don't push me away  
Because with you my heart will always stay

I believe in you  
Have faith in all you do  
No doubt that to me you'll be true

I don't want to spent a minute apart  
Because our love is like a work of art

My best friend and love  
My angel from above

## My Heart Instantly Knew

To have you is a blessing  
And now to the feelings in my heart you have me confessing  
Never thought I would find someone like you  
But once I did my heart instantly knew  
You're the one to be by my side for life  
I dream to be made your wife  
With you I have a bond so strong  
Everyone can see we're meant to belong

When we're apart I can't help but miss you  
And all the little things you do  
Your hugs, your kiss  
They're impossible not to miss

## My Hero

She's the one who created me today  
The one who has influenced me in everyway  
Offering me so much in so many ways  
Without expecting anything in return  
The one I look up to each and everyday  
The one I see shinning back at me  
My star in the night sky  
My hero by my side  
Each day we understand each other even more  
Learning something new each day  
Our bond so strong  
Nothing will break the love we share  
No one can compare  
For what you have done for me is indescribable  
You'll always be my hero  
No matter what you do

## My Life Is My Book

Thank you for the broken heart  
You've left scars in my memories  
Never knew that we would ever be apart  
Too many other girls have written about you in their diaries  
But I'll never forget about you and me  
And what we have been  
It's time to move on  
I'm going to turn off our song  
Stop looking at the pictures we took  
My life is my book  
I'll turn the page  
And I'll grace my stage,  
With a smile  
It may have taken me a while  
But I'm getting over you  
And what you used to make me heart do

## My Rose

Unfolding like the petals of a rose  
Your smile spreads across your face  
Everyday I'm greeted by your grace  
And it sends me to a brand new place  
Never thought that this would be me  
    Safe within your arms  
    Taken by your charm  
    Delicate is your love  
And it's laid out in front of me

## My Shadows

Hidden from view  
Dismissed from your thoughts  
Capable of living on my own  
Fought through most of it  
The rest I will go alone

Living in the shadows  
Maybe I don't belong anywhere  
I'll take another lie  
But all I can see is what is beneath the words  
Unable to be the one you trust

I thought everything was fine  
But now I see I was just taking another lie  
Every word loses the true meaning  
Just disappear into the shadows  
Away from this cloud of confusion

## **My Star In The Sky**

The night sky is so bright  
Alive with the dancing stars that give us light  
Each a loved one gone  
Making sure we stay strong  
Each day goes by  
And not another tear will cry  
As each person has a star in the sky

## My World In You

You've knocked me off of my feet  
You've turned my world upside down  
You drive me crazy all the time  
But to me you'll always be perfect

Never thought that this would happen  
Saying you are the one  
Falling in love  
Hoping you are there through it all  
Because now you are my world

Laying beneath the stars  
Listening to your heart beating  
Not saying a word  
The silence says it all

There is something about the way you smile  
That lights up the whole world  
There is nothing that I could do without you  
There is something about your eyes,  
That makes me fall every time

## Never But Forever Always

Our love has always been like  
The final call in the terminal  
The end has always been there  
But we've been too scared to leave  
Our love means we will always be  
Best friends but never anything more  
We have history,  
But we'll never have a future  
We are never going to change  
Never but forever always

## Never Going To Change

I'm sorry I've got to let you know  
I guess I still need you  
Long for your arms around me in the dark  
But it's time to let you go  
I long for all the things you used to do  
Like watching the sunset in the park  
Baby I want you to know that it's you I love  
And you the only one I think of  
Late at night  
If only those times we didn't fight  
Then we would still be together  
Lasting forever  
My feelings never changed  
Ever since that first look we exchanged  
We may have gone our separate ways  
But it's in your heart my love will all ways stay

## New Directions

I know things won't change  
So I guess for now it's good bye  
One day we'll meet again  
Please don't blame yourself  
Especially as this is something I have to do  
For some this may seem an easy option  
But for me I can't believe that it's come to this

I'll say good bye for now  
As I don't want to walk away forever  
One day you'll understand  
Our love isn't ending  
It's just taking a new direction  
Now we'll be strong, moving on  
Let's just go on in our different directions

## No Doubt

Every time I hear your voice  
My heart stops without a choice  
The butterflies in my stomach are set free  
All the happens just by you speaking to me

When you're near  
I know there is no need to fear  
You're by my side day and night  
In you I can confide, we have no need to fight  
Because you are my guiding light  
My partner in life  
No doubt one day we'll become husband and wife

## No Trust No Love No Angel From Above

Your side of the bed is empty  
And so is the part of my heart that you once lived in  
My eyes are so dry  
There are no more tears left to cry  
Memories of you everywhere I turn  
The pictures of you I just want to burn  
Your love I would once yearn  
But not after I found out about you and her  
No trust, no love  
No angel from above

## Not An Imitation

How do you tell the one you love  
You're in love with another  
Who promises the world  
Not just material things like diamonds and pearls  
A man who treats me like a princess  
He doesn't listen to my past as if it's something I should confess  
Promising to help me succeed my dreams  
And test life to its extremes  
A complete gentleman  
One who will pay for meals and hold open doors  
Who will carry you shopping from the store  
The only person you want to catch you when you fall  
The first to be in your missed calls

A real man  
Not an imitation of one

## Not Ready To Leave

Staring at my beating heart  
I'm not ready to leave  
Not yet  
Sharp and so powerful  
Plunging deep  
I'm not ready to leave  
Not yet  
You were just a stranger  
Eyes filled with danger  
So forceful, you'll never be remorseful  
I'm not ready to leave  
Not yet  
Maybe this is my end  
A kitchen utensil  
Taken all chance  
For a happy ending  
I wasn't ready to leave  
But I guess I'll have to be

## Not Ready Yet

Walking around  
Staring at the ground  
People passing by  
Not ready for another good bye  
Stay a while longer  
Maybe we will become stronger  
Just like Romeo and Juliet  
We have a love no one will forget  
Let's make this last  
We can't let another moment pass

## Not Where I Want To Be

The days come and go  
It's time to get away  
I'm out of time  
It's never going to be my day  
Stuck in the traffic jam of life  
Standing still not making it to where I want to be  
Someone's standing on the brakes  
It's time to move  
Don't want my life to be put in reverse  
I can't come back stronger  
Because I'm not where I want to be

## Nothing But Perfection

Let's make a decision  
A fatal incision  
Love or hate,  
Whatever it must be fate  
Come in closer  
I'm not a poser  
I want the best,  
Won't settle for anything less  
Love me or hate me  
I'm all that you can see,  
And everything I want to be  
Nothing but perfection,  
God's own selection  
You might be standing tall  
But who's going to be there when you fall?

## One Thing I Would Do

There's a light above me  
Guiding me back home  
Back to those I can turn to  
Especially as I can't last a day without you  
With my last breath there is only one thing I would do  
Say I love you  
Please be there waiting  
And never be contemplating  
I'm coming home now  
I hope I'm doing you proud

## One Way Friendship

Together we said we would be friends forever  
Stick by each other everyday  
Every private joke I'll remember forever  
One argument things change  
But I remain by your side  
I know what you mean when you say –  
'Things will be awkward'  
Slowly things go back to the old ways  
Another day, another joke  
So much trust between you and I  
Another argument things are different  
I thought I'd find you by my side  
And help me solve this riddle of problems  
Lost without my friend forever  
Everything we said, lost in our friendship untold  
One lost joke, though it doesn't seem as funny without you  
Maybe one day we will be friends forever again  
But for now...

Your secrets safe with me

## Only Ready

Your voice runs through my head  
Your touch lingers on my skin  
You're standing in front of me,  
Eyes locked, body frozen  
The sound of our hearts beating,  
Echoing from the walls  
I'm only ready to fall  
If you're going to be there through it all

## Our Heroes

Fighting for you and me  
So we can be what we want to be  
Giving their lives  
Spend a minute thinking about those who didn't survive  
The wives left behind  
See them come home  
Give them some respect  
What more could we expect  
They give everything for us  
Not doing it for some kind of buzz  
Lives are lost  
For such a big cost  
You shouldn't have anything to hide  
They are our pride  
Give a thought to all the families  
Forget all the controversies  
They're our heroes  
Let's support them in what they need to do  
Remember it's for me and you

## Our Illustration

A camera can only ever  
Illustrate the memories that you hold in your head  
But together we can relive  
Every little illustration that you hold in your hands

We can dance, under the stars  
We can eat, together a picnic  
We can watch that same film in each other's eyes  
We can talk, about everything under the sun

A person can only ever, make a memory  
But together we can make that memory last forever

## Plain for Anyone to See

We're meant to be together  
So give me the chance  
I'll be by your side forever  
Be one hundred percent faithful  
Give you gifts and buy you things  
I'll treat you right  
Be by your side, no reason for us to fight  
Never do you wrong  
Because in my heart you belong  
I'll never leave you for anyone else  
Won't let anyone come in between  
You and me  
Because we're meant to be  
It's plain for anyone to see  
Call me when you get lonely  
Because I want to be your one and only

## Precious

You body so precious  
Your mind so priceless  
Your soul floating lifeless  
The result of so many harmful words  
Making your soul float away like a flock of flying birds  
I wish you could see  
That what is happening to you just isn't the way it should be  
Each time you forgive and forget  
They'll never live with regret  
You are worth so much more  
The pain worse than before  
One day you'll open your eyes  
And the haze will rise  
Let the truth be told  
About the life that used to be controlled  
Your feelings no longer need to be hidden  
The pain you once felt will never be forgiven

## Promises Mean Nothing Anymore

Do you know the feeling I have inside when you say my name?  
Yet you still play with my heart like it's a piece in your game  
Love can nearly always turn into hate  
Passion that dies, I guess that's just fate

You might not be by my side  
But I can't hide the feelings in my heart  
You can walk away  
But these feelings will stay

I know you've played around  
Yes you let me down  
But no I can't let you go  
I still love you and that you've got to know

I'm sure we can work this out  
All we got to do is talk this out  
Just between us two  
I know you want her, just remember all that we've been through

Will she stand by your side like I have?  
Will she play around like you have?

Remember I said I'd stay  
Even after the first time  
Gave you the benefit of the doubt  
Believed every word  
Forgot everything that I'd heard

So much for love  
Being your princess and your angel from above  
Didn't you say that to her  
And on my life you swore  
That the first time would be the last time

I know you've taken me for a mug  
But I'm hooked on you like some kind of drug  
Every time I decide to walk away  
I turn right around and agree to stay

Promises mean nothing  
It's time to prove to me something  
If this is love or hate  
I need to know our fate

## Separate Ways

I know I've got to do this  
But boy your love I'm going to miss  
We can't work it out anymore  
Because my heart is shattered in pieces on the floor  
We agreed to take it slow  
That way our love would be guaranteed to grow  
We couldn't be more wrong  
Proved in your heart wasn't where I belong  
You couldn't even remember the name of our song  
Don't tell me to calm down  
I'm not even asking you to stick around  
Didn't think in our home it would rain  
Filled with screaming, heartache and pain  
While I let my heart and brain make a mends  
We can't even stay friends  
It's time to go our separate ways

## Setting The Scene

Laying on the ground  
Looking so peaceful  
The scene around you devastating  
Flashing lights, sirens, blood  
Everything is done for a reason  
What reason is good enough for this?

Would you want to live again?  
If there was an end like this  
Would you be the victim?  
Living in a new space  
I'd be happy to take your place  
Will you be happy now you lay so still?

## She Says She Loves Him

She says she loves him  
But everyone can see it's just a whim  
She thinks it comes from her heart  
But in reality they should be apart  
He can't see through the lies in her eyes  
And comforts every tear she cries  
Their hearts are like an out of time collaboration  
It's only going to end in devastation  
A love without any sign of hope  
I wonder if his heart will cope...

## Sleep Tight

Each number has a name  
And each name has a number  
Imagine being lost in a crowd  
Never to be found  
Just a number with a name  
A name lost in this world  
Fighting for you and I  
For us to have a piece of mind  
I hope you sleep well tonight  
Knowing a number with a name  
Died for you tonight

## Small Steps

Music plays in my head like a movie  
You're the soundtrack to my life  
It's never going to be easy  
But you've always been around to save me  
Now you've caught me just before I fall  
You hand grips mine  
Taking small steps  
Don't know who I'd be without you  
Your face decorates my dreams  
Your hand guides me down the street  
My heart won't beat without you  
I can't take a breath without you

Take a step back,  
See who you've made me  
Take a step beside me,  
See now your guiding me  
Take a step in front,  
See your going now

## Someday Soon

Today maybe a new day  
But there will always be  
The problems on the outside  
The people who can't see who you really are  
The ones who want you to be different

You always say, make the best of what you have  
But how can you when,  
You know someone will die  
You know someone will be unhappy  
You know everything is out of your hands

I know tomorrow is coming  
And there's nothing you can do  
No one will start a new  
For some it will end  
But for someone somewhere it will be a good day  
For you it could be today, tomorrow or someday soon

## Something To Remember

Some people call you crazy, I call you mine  
Together we'll last till the end of time  
Written like a fairytale, our love is meant to last  
Forget about the past, look into the future  
Together we'll make it something to remember

A moment together will last forever  
Saying those three words to each other  
And knowing we'll never part  
Always treasured in my heart

Written in the stars  
Is our future in each other  
Guiding us down our path together  
Finger interlocked  
Hearts intertwined  
Just like those two star crossed lovers

## Sorry For Breaking It To You This Way

I never asked to fall in love  
I'd already given up  
Don't need an angel from above  
I'm all out of luck  
I'm not willing to try  
It will only be a waste of time  
Sorry if it's not what you what you want to hear  
But I just don't want you near  
I'm sorry for breaking it to you in this way  
But there wasn't anything else for me to say  
There's not much either of us could do  
I just don't love you

## Spiralling Love

Love, hate, passion and fate  
One minute you're walking tall  
The next you're falling beyond all control  
If it wasn't for the glint in your eyes  
That shot me to the skies  
My heart wouldn't be breaking  
And this smile I wouldn't be faking  
I just wish I was the one on your mind at night  
And during the day we didn't fight  
Saying things we didn't mean  
Believing what everyone else has seen  
I know I've had my chance  
But really you shouldn't have shot me that glance  
Do you know the feelings I have inside when you say my name?  
How can you play with my heart like it's a game?  
Boy do you have no shame  
Following my every step  
With love you don't have time to prep

## Stay By My Side

You've opened my mind  
To what the future could hold  
Fingers intertwined  
Hearts beat in time  
You're like the puzzle piece I've been trying to find  
Your love feels electric  
Pulsing through my veins

I'm ready to fly  
With you by my side  
Gliding through everything  
Happy or sad  
Good or bad  
Together is how we're meant to be

I like the way you say my name,  
The way you never want to bring me pain  
And those days we kiss in the rain  
The small things like the smile you try to hide  
And all the secrets you confide

I'll wish tonight  
That you'll stay by my side

## Take Every Chance

No second chances  
Refuse to give you any second glances  
You walked out on us  
And left me behind  
Another door has closed in my face  
But I just stand up once again  
And face the world with a smile  
Because I know I can do better  
Than what you gave me  
Find another who loves me for who I am

Every day is a fight  
But for once I've seen the light  
And I know that this life is my fight  
To prove myself  
To me and no one else  
Push my mind, body and soul to its limits  
So that I know I've done all I can

Don't want to blink  
In case I miss anything  
Only got one chance at this life  
No need to keep believing the lies  
Just got to realise the love is in my eyes  
For this world  
Take every chance  
Don't let it slip passed

## The Best Is Yet To Come

A part of you is a part of me  
And will always be  
But now we're through  
We'll walk our separate ways  
It may take days  
But in time you'll see  
The best is yet to come  
I hope you understand  
All is said and done  
Walk with your head high  
Because both of us know  
How hard it is to say goodbye  
With all the memories  
And special places  
In one of those new faces  
You will find love  
Another heart to treasure

## The Feeling Inside

Your hand in mine  
For all of time  
Please guide me through  
As I never want to be without you  
You're the breath in my body  
You're the beat in my heart  
I've been waiting for this feeling  
That I'm slowly revealing  
I need to hold you  
A need that's become overdue  
You've opened my eyes  
To the feelings I have inside

## The Lasting Memory

Things will change  
People will move on  
Memories forgotten  
The only thing that will stick in my mind  
Is the way you stick by my side  
True friends forever  
The one memory treasured in my head  
Kept safe forever

## The Minority

People stop and stare  
They're the ones who need a sign saying beware  
When they know your name  
They'll start following your game  
Your names in lights  
Soon people are in your face  
This is when you need some headspace  
They'll start stabbing you in the back  
Their words on the attack

All I'm trying to say is  
Keep your head  
Watch your back  
Focus on the track,  
Laid out in front of you  
Forget about the small few  
They are the minority

## The Performance

Speakers make the sound loud  
Performer onstage proud  
Doing their thing  
To hear the crowd sing  
So many lights make the temperature sore  
Now the audience wants more  
What's this you hear?  
Could this be an encore?

## The Silent Suffering

A tear running down your face  
You explain your pain  
Day after day you've suffered  
Every hour you've never said a word  
Your voice unheard  
Now you have the confidence  
That you once lost  
Separated from the world you once belonged to  
All you need is a sense of security

## The Step I Have To Take

How many chances before you call it a day?  
How many lies have I got to hear before I get my say?  
I'm hearing so much nonsense  
Boy don't you have a conscience  
Can't you see what you're doing to me?  
A romantic gesture, on bended knee  
That isn't going to help you now  
I can't even scream about that other cow  
You've reduced me to petty name calling  
I wish I'd known when you had me falling  
That I wouldn't be your only  
The last to call when you got lonely  
I won't be running back  
I refuse to let the tears leave tracks  
I'm turning my back on you  
And everything you say you will do  
Your words mean nothing  
I'm just going to concentrate on living  
This is the step I have to take  
Even if it means my heart will break

## The Truth

You want things to be right  
We talk all night  
But deep inside  
I know we can't hide  
The truth that we want to deny  
Like two pieces of a puzzle that just won't fit  
No matter how hard we try  
We just can't lie  
It always ends the same way  
What we think is right  
They know is wrong  
We can't hide the fact we want to deny

## Them And Me

Tell me what you think of me  
I know the truth must be bad  
Especially now, after all that was said  
You say to me that you'll never forget  
But when you're with them it's already forgotten  
You tell me, honestly  
But you tell them truthfully  
It could have stayed like this  
But I broke the pattern  
I knew I couldn't compete  
With these, I'll remember our honest memory  
You remember your truthful memory  
At least with us it wasn't just one way

## This Is You

You want to be that person  
The leader of the group  
The one everyone looks up to  
Somehow it doesn't feel right  
Being someone else  
Not being yourself

You become the one you trust  
The one you know best  
The one you know inside out  
Today it feels right  
Being yourself  
The one you look up to

Suddenly you find out  
Who your friends are  
The people you can trust  
The ones you can rely on  
Somehow you know...  
It was always meant to be

## **This Should Be The End**

Save me from falling  
I don't want my heart to be calling,  
After you  
Remember the times you cried  
Accusing me of things, saying I had lied  
But it wasn't me, was it  
This should be the end of us shouldn't it?  
Cursing my name  
But it's you with the unfaithful fame  
Don't be throwing accusations  
Especially when we've had too many confrontations  
I'm ready to leave  
Because I just can't believe  
That you have strayed  
While my heart has stayed  
Don't take me for a mug  
As on our love I have pulled the plug

## Time To Come Clean

The situations getting old  
People are talking, things are being told  
I know I should have walked away  
But it was my heart that strayed  
Played games with my mind  
It was only his love that I could find  
You'd decided to head on home  
But it was to another I'd decided to roam  
One more dance  
Captivated by his glance  
I know I've got to come clean  
Especially as so many have seen  
Him and me  
This situation isn't right  
I can't take it, I don't want to fight  
But I guess then that's just fate  
When love turns to hate

## Too Good To Be True

When everything goes wrong  
You're always the outsider  
The one no one believes  
Maybe I should have realized  
The friendship we had was,  
Too good to be true

When they all come running  
I'll always remember  
When I became the outsider  
The time I should have realized  
The friendship we had was,  
Too good to be true.

Now I know  
Never forgotten  
The outsider I will always be  
I have realized  
The friendship we had was  
Too good to be true

## Unfaithful Lies And Crazy Accusations

We'll be sat at the dinner table  
Trying to hold a conversation  
But the foundations of this love are unstable  
Unfaithful lies and crazy accusations are the foundations  
Won't be long until the first plate smashes to the floor  
And I'm heading to the door  
The tears on your face can't bring me back  
Can't change it, no that's a fact  
So many times we've tried to have this talk  
But I've had enough and I'm going to walk

## Until You Make It

I might not be who you want me to be  
But I'm telling you now  
I'll be making it back somehow  
I've been making the headlines  
But only because life has no streets signs  
To point me in the right direction  
I have no angel to offer me protection  
So I have to carve my own pathway  
Ready for when it's my day  
Don't be forgetting it  
Or you'll be regretting it  
The day you make your name  
Is the day when your life won't be the same  
So take your time  
And treasure every dime  
Don't use it  
Or you'll abuse it  
The faith that you have will never fade  
Until the day that your made

## We're Becoming To Be

I know I'm not perfect  
But I do my best to get as close as I can  
You say I don't need to change  
I see the doubt of you own words in your eyes  
Our relationship used to be fine  
I knew one hundred percent you were mine  
But lately people made me question how we feel  
And if our love is real  
To them we can't be  
Anything more than average  
But I thought we were perfect  
And nothing less  
It was only you I wanted to impress  
People started talking  
Then my mind started walking  
Going round and round  
Thinking about  
All the little things you said  
The looks you give the other girls  
The distance you're putting between you and me  
Maybe it's just me  
Or what they're saying we're becoming to be

Tell me they're wrong  
And it's in my heart you belong  
Say things will always be perfect  
Between you and me  
Say there's no need to question it  
Because our hearts are a perfect fit  
It all I want to hear from your lips  
A comfortable silence  
A little reassurance from you  
Once in a while

## What I Need

So many things that I want  
Top of the list is a knight and his steed  
Second is true love  
Followed by an angel sent from above  
True love and protection  
What I need is your affection  
But there are some things that I'm dreaming about, if only  
You were the one to hold me when I'm lonely  
Then I wouldn't have to be dreaming anymore

## What We Are

Teenagers, prejudice  
Louts and layabouts  
Hoodys, scum  
Times have changed  
Communities rearranged  
Knives carried for pride  
Cars taken for a joy ride  
You only see the bad  
All the things that make us mad  
You want us to change  
But we can't  
It's how you make us today  
We need opportunities  
Some sense of responsibilities  
We are the youth of today  
But we can't repay to the communities  
You've taken everything away  
Then leave us with the blame

Give us a break,  
You get me?

## When Love is Hard

Love is hard  
And sometimes you wish you were dealt another card  
At one time so strong  
Never did you think this could be a place you would never belong  
A future being built together  
A love at one time you thought would last forever  
Other times you think you couldn't be luckier  
But when I see you I wish I was a little pluckier  
You never let my dreams fade  
A life that everyone else would think is made  
But yet I'm still filled with doubt  
With my unclear expression you wonder what this is about  
If only I could explain  
But this lie I'm living isn't simple and plain

## When The Stars Fall From The Sky

We promised to be together  
Until the stars fall from the sky  
By my side forever  
Till the day you die

The promise you broke when you strayed  
Never would have I experienced such pain  
To god I have prayed  
That in my heart it won't ever rain

Night after night I lay awake and cry  
On the phone I hear you apologise  
There's not a way for you to make it right  
I just want to walk away into the night

## When You Left

One day you was here  
Sharing your stories  
I can remember every word so clear  
You had so much still to give  
I wish you was still here

One day you was gone  
Unable to return  
Where ever you are I know you will belong  
I wish it wasn't your turn  
Now I will have to be strong

When you left us  
We had to learn to cope  
But we will never forget the braveness you showed  
When this happened we lost all hope  
After all you went through you glowed

Now I look up and realize  
That you are looking down on me  
And on everyone that you reached  
Your time here was special  
To everyone in so many different ways

## When You See A Star

When a star shines bright  
You know that's your guiding light  
To fill you with hope and happiness  
And days when your dreams are ready to progress

When you see a shooting star  
Don't wish for material things like a super car  
Just wish to live everyday as if it's your last  
That way you know your life will be a blast

## Who's love?

I thought our love was strong  
I thought your arms was where I belong  
Until you spoke those words to her  
I thought it was my love you'd prefer  
I guess know it's time for you to choose  
Whose love it is you'd prefer to lose

## Why

The hardest words to hear  
Unable to take them in  
Wishing there was something you could do  
Trying to hide all emotion  
Pushing away those who really care

Trying to understand why  
Why does this have to happen now?  
Why is it you that has to be the one  
Everything was going so right  
The world is turned upside down  
Nothing seems to have a bright light  
All I want is for the world to stop  
Just for a day

So we can find a reason  
A reason why.

## Wishing On A Star

If I could have just one wish  
I wouldn't ask for money  
I wouldn't ask for the latest label  
I wouldn't ask for a fast car  
I wouldn't ask for an exotic holiday

If I could have just one wish  
I would ask for one day with you  
I would ask for your love  
I would ask to know how you really feel  
I would ask to not have to let you go

## Without The Knife

You want to own me  
But I just want to be  
All that I can be  
A friend that you can rely on  
The star that you can wish upon  
I'll never doubt it  
Just live the life  
Don't carry a knife  
Don't use it  
Or you'll abuse it  
The trust that's been handed to you  
Time to start a new  
Follow the road a head  
Look into the future instead  
Of living with regret  
It's time to forget all of the upset

Just live the life  
Without the knife

## Without You I Have No Wings

We'll learn to fly  
I'm an eagle  
But without you I have no wings  
As time passes us by  
We start to soar  
A love filling the two of us  
Going on a journey  
Seeing so much  
Blessed to be able to feel your touch

## Won't Bring You Back

Falling so hard to the ground  
It's a wonder your soul can still be found  
Gliding to the sky  
Your angel wings take you so high  
I have a wish, only one request  
It's probably not for the best  
But it's my only request, my only hope  
The only way for me to be able to cope  
All I need is to be able to see your face again  
Your whole life has disappeared down the drain  
All because of someone's terrible crime  
They might be behind bars doing time  
But that won't bring you back

## Words For A Mother

Everything that I am  
Everything that I will be  
Everything that I have been  
I because of a mother's love deep within  
Teaching me everything  
Telling me to make the most of what I have  
A mother, daughter bond,  
So strong  
An unbreakable love  
A guiding angel sent from the skies above  
If ever I'm down  
You always find a way to make me smile  
Never have you let me down  
So many memories to make me smile every once in a while  
Never would there be a way  
To thank you for what you have done for me  
So these few words are a way to say,  
A thank you for the love you have given me,  
The things you have taught me,  
And the mother you are to me

## Words For You

You are the one I run to  
Even after all we've been through  
So this is for you  
I know it's only a few words  
But if you could see  
That everything you have done for me  
Has helped me become who I am today  
Then maybe one day I'll be able to repay  
All the strength you have given me

## Words On The Paper

Staring into space  
Thoughts clicking into place  
Words falling onto the paper

Just like painting a picture  
Another worded mixture  
Creating a master piece

The page is quite full  
The story quite full  
But still quite meaningful

## Worry

The tear running down your face  
Followed by another and another  
Lost without a trace  
Could there still be a chance of return?  
Your silence is like a cruel beating  
The worry I feel is indescribable  
One day I hope you will realize  
And that you will understand the pain I feel

The blood running down your hand  
Drip after drip  
This isn't the escape you wanted  
But somehow it is making things clearer  
Hiding your fear  
A new person standing before me  
Why can't it be simple?  
Why is it this way?  
Why can't I help?

## You Can Hate Me Now

Maybe you don't miss me  
But do you miss our friendship  
Would you miss me if  
I wasn't around for you to hate  
Maybe that will be easier on both of us  
At least then we wouldn't have to fake what we don't have  
And the feeling that used to be there  
But seems to have disappeared along the way  
But this feeling isn't right  
That's why for now  
I won't be around for you to hate

## You'll Never Be Alone

I want to let you in  
There are so many stories to share  
Although I don't know where to begin  
To our love, no one can compare

Your smile lights up the darkest of my days  
And for this I'll repay  
All the care and love you have shown me  
Is more than I can be  
To have you by my side  
Between us there's nothing you can hide  
To know it's in you I can confide

You've got to understand  
That it's this I need you to know  
You've got my promise  
That you'll never be alone

## Your Reflection

Take a bow and look around  
See what's staring back at you  
A haze of lies and dishonesty

Turn around and look in the mirror  
See the reflection  
This isn't who you see

Look me in the eyes and say why  
I thought you could tell me everything  
Why lie to me like this

Maybe you saw the bliss  
And knew what you would miss  
Is everything really worth all of this?

## Your Rosette

I wish everyone could see  
What you have done for me  
You pick me up when I'm down  
I know when your around I'll never frown  
The problems we share  
Just because you care  
No one could believe

If you ever leave  
There's something I know you should get  
A special gold rosette  
For everything that you've done  
Has made me what I have become  
I know I'll never forget  
Everything that you have been  
I wish everyone had seen

## You're My Night

As day turns to night  
The stars hold the promise you'll hold me tight  
Your breath on my neck gentle as the breeze of the night  
Never could our love result in a full blown fight

The night is calm  
That's how I know in your arms I'm safe from all harm  
As I close my eyes to dream  
I'm reminded of your love for me

The night is turning to day  
Yet I still wish it would stay  
Your lips greet my neck without regret  
If I was glad of anything it's that we met

## About The Author

Hi, you're reading this section because you want to know a little bit more about me. Well the first place to start is my name, Esjae isn't my real name, quite obviously, it's actually Stacey Hubbard. The shortened version is the extended version of my initials 'SJ'

My passion for poetry comes from one very memorable English Lesson in year 9, we were meant to be watching a modern film version of Romeo and Juliet. But I just couldn't get into it (Ms Bailey would kill me), so I ended up writing - 'Hood Up, Head Down' my first ever poem! Ever since then my passion for writing and poetry has just grown and I write whenever I get the chance.
